

# Deployment Steps

## Download

- 1 Download the Replify trial from [www.replify.com](http://www.replify.com).

- 2 An email from Replify will give you links to download the Virtual Appliance & Enterprise Manager.

- 3 Virtualisation platforms supported include VMWare ESX, Microsoft HyperV, QEMU/KVM and Docker.

## Installation

- 1 Deploy a Virtual Appliance close to the applications you want to accelerate.

- 2 Browse to <http://your-va-ip/> to access the dossier. Send the dossier to [support@replify.com](mailto:support@replify.com) to obtain your license key.

- 3 Install your accelerator Client (or another Virtual Appliance)

## Configuration

- 1 Login using username **admin** and password **default**.

- 2 Add your Application Servers and any SSL certificates. (if required)

- 3 Connect the client to your VA and begin optimization!
